NEEM SEED

EXTRACT

Use: to control all sucking and biting insects

INGREDIENTS

dry neem seed kernel
7.5 kg

30x

water
30 lit

TOOLS

- * 2 small drums
- * cloth
- * pestle and mortar or electric grinder

MODE OF ACTION

Neem interferes with the hormonal system of the insects when they smell it or ingest it. Insects „forget“ to eat or mate and eggs will not hatch.

Dose: use 3 lit Neem seed extract per pump (15 lit)

Shelf life: use it within 2 days

Limitations: no limitations known

Active Ingredients: Azadirachtin

PREPARATION

Step 1:
Grind the neem seed
kernels to powder

Step 2: Mix the powder
with the water.

Step 3:
Cover the drum with
the cloth and soak it
over night.

Step 4: Filter the mixture
through the cloth and squeeze
it thoroughly.
